

A Guide to Fixed Term Deposit

A Fixed Term Deposit Account lets you save money for a set period with a fixed interest rate. The interest rate will not change during the term. This means you know exactly how much interest you'll earn by the time the account matures. If you think you'd need access to your savings before the fixed term ends, this is probably not the right account for you.

Account Features

- Deposit from £1,000 to £2,000,000 for the 1 and 2 years fixed term deposit accounts.
- Deposit from £1,000 to £500,000 for the 6 month fixed term deposit account.
- You have a choice of 1 or 2 years fixed term deposit with fixed interest rates that won't change during the term you choose.
- Interest is calculated daily through the applicable interest rate. Interest will be applied to your account balance at the end of the fixed term.
- No withdrawals allowed.

Additional Information

You will not be able to close your Fixed term Deposit account before its maturity date.

* AER stands for Annual equivalent Rate. It illustrates what your interest rate would be if interest was paid and compounded each year and allows you to easily compare different savings accounts. As every advertisement for a savings product, which quotes an interest rate, will contain an AER you will be able to compare more easily what return you can expect from your savings over time.

**Gross is the rate of interest payable before any tax is taken off.
